Why me instead of him ?

I believe I have qualities other than my athleticism that make me a better suited professional than others competing for the same opportunity. I consider some of my positives to be my understanding of the game, physical strength, and work rate. I am fully dedicated to being a professional as well as maintaining a healthy life style which is very important to being successful. Overall I have full confidence in my ability and determination to work hard and earn a spot on your team and do not expect to just be given one.
